

# DID YOU KNOW ?

**TAKE ACTION NOW:** Preventive visits are on the **decline**  
and **your** health risk-scores are on the **rise!**

7%

10%

March-August  
2019 v. 2020

For the HC21 Cohort, the percent of members with **\$0 Medical Claims** increased from 7% in 2019 to 10% in 2020.

**Thought:** For members with chronic conditions who may have foregone routine visits during 2020, how will this affect their future health-risk going into 2021?

## Changes in Preventive Visits and Future Risk Scores

Age Band	Decrease in Preventive Visits	A similar trend is apparent in Preventive Visits across the cohort.	Increase in Future Risk Scores	<b>Future Projections:</b> Based on claim trends comparing 2019 to 2020, the data forecasts <i>increases</i> in members' future risk over the next 12 months across all age bands.
Generation Alpha (2010-2024)	-10.1%	There's a significant decrease in the percent of each age band that seeks preventive care year over year.	5.0%	
Generation Z (1997-2009)	-4.8%		12.6%	
Millennials (1981-1996)	-7.2%		5.4%	
Generation X (1965-1980)	-8.4%		5.7%	
Baby Boomers (1946-1964)	-9.4%		3.2%	
2019 v. 2020		What care is your population sacrificing this year?	2021 Projections
